

Name of the Original Song: John Lennon, Paul McCartney – Let it be

Library Song Lyrics:

LIBRARY

When I feel desperate academically

Library calls to me

What a place to increase my wisdom: library

And just before the exams,

It is standing in the middle of the campus

I'll be working there for hours, library

Library, library

What a place to increase my wisdom, library

If the confused minded students gather in the library

There will be an answer, in library

For though they may not find it

There is a catalogue that they will see

They will find an answer, in library

Library, library

What a place to increase my wisdom, library

During the exam period nights

There is still a light in the library

Shine on till the semester ends: *let it be*

When I become helpless about resources

A librarian comes to me

Speaking words of wisdom: *let me*

Library, library

What a place to increase my wisdom, library
